What the analysts really do.

“I was looking for something like baseball,
where there's a lot of data and the
competition was pretty low.”

Nate Silver, Guardian interview

The organisation as a graph - using for reporting

“If you’ve never considered applying your talent in data sciences to the field of HR, you should: HR Analytics is a rapidly growing area of research and application where you can really make your mark.”

Come to Amazon – we have Big Data! Amazon is looking for an outstanding Data Scientist to be part of our HR Analytics. If you’ve never considered applying your talent in data sciences to the field of HR, you should: HR Analytics is a rapidly growing area of research and application where you can really make your mark. At Amazon, data is all-important. Help us build a group on the forefront of HR Analytics using predictive techniques and rigorous statistical approaches to shape the field of HR Data Science.

Responsibilities include:

- Develop analysis plans and implement appropriate statistical techniques to answer complex business questions.
- Independently analyze HR and business outcomes data in order to identify relationships and trends; incorporate data visualization of statistical analyses.
- Develop predictive models for important business- and people-centered outcomes
- Interact with executive project sponsors across multiple businesses to understand the business outcomes important for success; operationalize those outcomes in ways that can be measured and ultimately predicted.
- Drive the collection of new data and the refinement of existing data sources.
- Interpret data and communicate complex findings to leaders in HR and across business.
- Write research papers for internal audiences.

Basic Qualifications

- 8+ years of industry experience
- Master’s degree in Industrial - Organizational Psychology, Behavioral Economics, Statistics, or related field
- Strong statistical skills (HLM, regression, ANOVA, IRT methods, Structural Equation Modeling, etc)
- Strong technical skills and proficient in programs such as SPSS, R, Excel, Access
- You document your approach for reference and reproducibility in the future
- Self-starter with the ability to work independently
- Great organizational skills and attention to detail; you are able to prioritize multiple tasks simultaneously without sacrificing the ability to dive deep
- Ability to communicate complex quantitative analysis in a clear, precise, and actionable manner
- Impeccable customer service focus with a demonstrated desire to exceed expectations; a team player with a solid work ethic

Preferred Qualifications

- PhD strongly preferred in Industrial - Organizational Psychology, Statistics, Behavioral Economics, Statistics, or related field
- Experience with RedShift and/or Hadoop; preferably with design and deployment
- Previous work experience in applying statistics to HR and business outcomes

Jobs:Walt Disney

Workforce Management...provide analytical support toward **decision support** and system methodology improvement efforts... may involve forecasting, workload planning, staffing, scheduling, or deployment. Ensure the appropriate methodology, measurements, tools and quantitative techniques (e.g. **data gathering, statistics, computer simulation, process flow analysis**, etc.) are applied in projects.

- recent graduate or post grad level in **Industrial Engineering, Mathematics, Computer Science**, or equivalent major with specialization in **Operations Research or Statistics**
