

Text analytics for beginners

An introduction to unstructured data in HR

Why is text analytics important?

With text you get context

I feel that my manager cares for me.

Strongly
disagree

Disagree

Neither agree
nor disagree

Agree

Strongly agree

Or

“I really believe in the firm but my manager doesn’t seem to care. He has never conducted a career discussion and only seems interested in targets.”

Typical uses for text analytics

Categorisation

Scoring

What is text?

Terms / tokens:	Words or n-grams
Documents:	Block of text
Corpus:	A collection of Documents

Pre-processing text is the key

“I really believe in the firm but my manager doesn’t seem to care. He has never conducted a career discussion and only seems interested in targets.”

Creating tokens

“I really believe in the firm but my manager doesn’t seem to care. He has never conducted a career discussion and only seems interested in targets.”
